

Team	Description	Number of Interns	Supervisor License
Adult Outpatient	<p>Adult Outpatient (AOP) interns will provide individual and group psychotherapy, as well as care coordination and case management to consumers aged 18-59. There will also be opportunities to complete intake assessments. Interns will have a caseload of clients for ongoing therapy. You will be exposed to a variety of diagnoses, backgrounds, and presenting problems. Interns must work constructively with consumers to reach agreed upon outcomes and coordinate care with internal and external providers. Hybrid position: minimum 1 day onsite required.</p>	1	LPC
Adult Collaborative Care	<p>Interns will be a part of a phase-based care model, that operates off the main goal of moving clients through the phases of care as quickly as possible to help them reach the maintenance stage and stay there longer, in as little as 6-10 weeks. From day one, clients are given access to a comprehensive set of wraparound services through a team of dedicated care providers. The team itself is a mental health one stop shop, comprised of a case manager, therapists, therapy interns, a nurse, prescribers, peer specialists and a wellness coach. In its current format, clients can receive care from the comfort of their home through telehealth or in-person at our Union Square location. Interns will provide individual therapy, initial assessments with group therapy options. Hybrid position: minimum 1 day onsite required.</p>	1	LPC
Senior Services Outpatient	<p>SSOP is an outpatient counseling program serving adults 60 years and older. Services include individual and group counseling for older adults in addition to psychiatric/medication management services and light case management. Senior Services also offers groups on hoarding, grief/loss, self compassion, and opportunities to create your own. Through solution-focused counseling, SSOP helps older adults regain confidence, increase their ability to cope with everyday changes, and assist with maintaining health and independence. Therapy work often incorporates managing co-morbid chronic health conditions. This internship provides diverse experiences with opportunities to work with other aging services providers, learn community resources, deliver presentations, and provide care management and clinical services. This placement offers a hybrid of in office and remote work.</p>	1	LCSW

Mountain Collaborative Care	Using a phase-based care model, Jefferson Center’s Collaborative Care Clinic Model operates off the main goal of moving clients through the phases of care as quickly as possible to help them reach the maintenance stage and stay there longer, in as little as 6-10 weeks. From day one, clients are given access to a comprehensive set of wraparound services through a team of dedicated care providers. The team itself is a mental health one stop shop, comprised of a case manager, therapists, therapy interns, a nurse, prescribers, peer specialists and a wellness coach. In its current format, clients can receive care in-person at our Mountain office in Evergreen or from the comfort of their home through telehealth. Interns will provide initial assessments, individual therapy, and care management. Hybrid position: Mondays remote & Wednesdays on-site.	1	LPC
Mountain Outpatient	Mountain Outpatient interns will provide initial assessments, individual therapy as well as care coordination and case management for consumers living in the mountain areas. Interns will have a caseload of clients for ongoing therapy and be exposed to a variety of diagnoses, backgrounds, and presenting problems. Interns must work constructively with consumers to reach agreed upon outcomes and coordinate care with internal and external providers. Hybrid position: minimum 1 day onsite required.	1	LPC
Adult Intensive Services	Adult Intensive Services (AIS) serves clients experiencing Severe and Persistent Mental Illnesses (SPMI) who need a higher level of care than traditional outpatient services may provide. AIS provides responsive, “wrap around” support including individual therapy, case management, psychoeducation, group therapy, and crisis intervention services in virtual, office, and community settings. In addition, AIS provides coordination of care, consultation, and advocacy with internal programs, external agencies, community resources, family members, and other client supports. Hybrid position: minimum 1 day onsite required.	1	LCSW
Substance Use Outpatient	Our SUD outpatient team provides clients with individual therapy, group therapy and intensive outpatient group therapy to offer a full spectrum of services. We have 11 therapists, an intake clinician as well as two case managers. We work closely with other JCMH teams to ensure collaboration of care and appropriate referrals. We complete intakes and assess for appropriate levels of care for co-occurring disorders. Our team is located throughout all outpatient JCMH locations and we also provide tele-health services. Hybrid position: minimum 1 day onsite required.	1	LPC LAC

Residential Recovery	<p>Our capacity is 15 clients providing exposure to a large variety of diagnoses. Daily staff consist of three milieu counselors (techs), one peer specialist, one nurse, one engagement specialist, two therapists, and an admissions coordinator/utilization manager in addition to clinical leadership. Often we serve more acute need clients that are new to treatment, veterans to treatment, and everything in between. Our population is most frequently clients that are looking to meet the earlier needs in Maslow's Heirarchy, seeking a brighter future in early recovery. An intern in this program will carry a caseload of no more than three clients and be responsible for meeting with them individually weekly as well as completing treatment plan updates, updating ASAMs, supporting with case management needs, and developing aftercare. Additionally, intern therapists are responsible for running one evidence-based group daily on material of their choice (established curriculum is available).</p> <p>An ideal intern for this placement is one that is interested in expanding their understanding of co-occurring diagnoses, invested in developing their trauma-informed approach, is detail oriented and organized, is an out of the box thinker, and good at operating with significant autonomy in a very fast-paced environment. This placement is 100% on-site.</p>	1	LPC
Recovery Clinic	<p>Interns will participate in a phase-based care model, that operates off the main goal of moving clients through the phases of care as quickly as possible to help them reach the maintenance stage and stay there longer, in as little as 6-10 weeks. From day one, clients are given access to a comprehensive set of wraparound services through a team of dedicated care providers. The team itself is a substance use/mental health one stop shop, comprised of a case manager, therapist, nurse, prescriber, and peer specialist, with support from an intake specialist. In its current format, clients have the opportunity to receive care in-person at our Independence office or from the comfort of their home through telehealth. Interns will provide individual and group therapy, care coordination, and case management services. Hybrid position: minimum 1 day onsite required.</p>	1	LPC

<p>Navigation - Mostly Meds</p>	<p>Mostly Meds interns provide both administrative/case management and clinical/care management support. Admin/case management duties include distribution of treatment plans, processing Colorado Client Assessment Records (CCAR), providing clients resources, and assigned projects for the Navigation department as a whole (i.e., reviewing and updating resources). Clinical duties include conducting initial assessments to get clients entered into services, performing therapy and overseeing a small caseload, consulting with internal therapists and prescribers, following up with clients, and level of care assessments for Navigation clients. There will be experience gained by working with medical professionals when collaborating on a client's care, as well as mental health professionals should a client need to be transferred to another clinical team due to a change in level of care. Hybrid position: minimum 1 day onsite required.</p>	<p>1</p>	<p>LPC</p>
<p>Crisis Walk in Center</p>	<p>The Emergency/Crisis Team provides crisis intervention services for the community 24 hours a day, 7 days a week, 365 days a year. Clinicians are trained in de-escalation techniques, crisis intervention, safety planning, and assessing the need for higher level of care. Anyone experiencing a behavioral health crisis is able to come to the Walk-In Crisis Center (WIC) at any time of day. The WIC is staffed with masters and doctoral level clinicians, a peer specialist, case manager, and registered nurses. This internship will focus on crisis counseling and intervention, crisis assessment for and preparation of mental health holds if needed, some intakes, care coordination, and outreach. Ideal interns are comfortable with brief clinical interactions and adaptable to dynamic and often changing working conditions. Clinicians are also available to provide mobile, community-based de-escalation for the purpose of addressing safety concerns while allowing clients to remain in the community and to prevent hospitalization. Services may be provided in-person or via telehealth. Interns are onsite for all internship hours. <i>Days available for internship are Mondays, Tuesdays or Fridays.</i></p>	<p>2</p>	<p>LPC LCSW</p>

FSOP	<p>Family Services Outpatient (FSOP) clinical interns will provide individual and family psychotherapy, as well as care coordination and case management to clients aged 8-22 years old. There will also be opportunities to complete intake assessments and facilitator or co-facilitate groups. Interns will have a caseload of clients for ongoing therapy. You will be exposed to a variety of diagnoses, backgrounds, and presenting problems. Interns must work constructively with clients/caregivers to reach agreed upon outcomes and coordinate care with internal and external providers. Hybrid position: minimum 1 day onsite required.</p>	1	LPC
ECFS	<p>Interns are responsible for intakes to assess the needs of young children and their parents/caregivers. Interns provide evidence-based treatments (e.g., play therapy, Child Parent Psychotherapy) using a systemic approach for a variety of early childhood mental health disorders, and have the opportunity to participate in parenting education groups and early childhood consultation activities. Interns participate in team meetings and group supervision. Hybrid position: minimum 1 day onsite required.</p>	2	LPC LCSW

TST	<p><i>This position requires you have your own car (mileage reimbursement provided), and that you are available afternoons and some evenings to provide in-home services to clients and families. Applicants should be 2nd year students or have experience in the field.</i> The TST team provides intensive family systems trauma treatment, with a particular focus in safety stabilization and regulation skills. We serve youth ages 4-21 and their families. TST clients must have a plausible trauma history and be at risk of hospitalization, placement out of the home, and/or legal system involvement. TST intervention requires work with both the child and their guardian. Services take place in the community, in homes, and occasionally in the office. Each case is typically seen twice a week by their therapist. TST interns will learn and be responsible for all aspects of care including intake, assessment, diagnosis, case management, and treatment provision. Training in the TST modality will be provided. Interns will be responsible for learning and utilizing the TST modality which will include weekly group consultation, case presentation to the TST team, and working closely with their individual supervisor. Many cases require strong communication between a clinician and other agencies, and many families are often engaged in multiple systems (school, court, human services, psychiatry, etc.). Interns will be assigned at least three TST cases for in-home services. Additional clients may be assigned via Family Services Outpatient or Family Services Intakes. Shadowing or co-facilitating opportunities may be available across other Center programs (youth groups, adult groups, crisis, etc.).</p>	1	LPC
Crossroad/Porchlight	<p>Mandatory group supervision and clinical consultation on Wednesdays from 11am-12:30pm. Hours are flexible; however, an intern will need to be available at least some evenings until 6pm M-F to accommodate families' schedules. The CrossRoads Team works primarily with adolescents ages 10-22 at-risk or involved in the juvenile justice system. Jefferson Center partners with PorchLight, A Family Justice Center, and interns will work with children and adolescents ages 0-22 who have experienced or witnessed domestic violence, child abuse, human trafficking, and sexual assault. Interns will be responsible for initial clinical assessments on new referrals, providing individual and family treatment (in-office and telehealth), providing professional updates and recommendations and leading groups. The internship spans two different programs. Interns will receive referrals from both the CrossRoads program and PorchLight program. You can view more information about the PorchLight program at this link. https://www.porchlightfjc.org/ Position is 100% onsite.</p>	1	LPC

Psych Testing	Under supervision of licensed psychologist provide psychological testing service to diverse clients with a broad range of presenting problems. Students will be trained on administration, scoring, interpreting, report writing, and feedback using standard cognitive tests and personality measures. For students trained in Rorschach opportunity to use in personality assessments may be available. Attend group supervision and trainings as required. Hybrid position with onsite testing required. Applicants must have completed assessment coursework.	2	LP
Psychology Externship	This placement is housed within the Psychology Doctoral Internship and receives supervision using a vertical supervision model. Students will receive supervision from psychology interns and from a licensed psychologist. Student will provide individual and group therapy for clients across the lifespan using Evidence Based Practices with caseload of 15 clients on average. Student will also perform initial intakes for individual seeking services through Jefferson Center. Student training on intakes focuses on developing diagnostic skills and risk assessment. This position is hybrid with minimum 1 day onsite required.	2	LP
